“An Insight into Life”

23TH – 25TH SEPTEMBER 2016

MAIN AUDITORIUM, 2ND FLOOR, BLOCK B
FACULTY OF MEDICINE AND HEALTH SCIENCES
UNIVERSITI MALAYSIA SABAH

<http://www.ums.edu.my/fpsk>

Organised by

INTRODUCTION

In the modern care and management of obstetrics patients, usage and understanding of ultrasound is essential. Ultrasound is used routinely to screen pregnancies as part of antenatal care with the aims that fetus/es are normal and to detect any congenital abnormalities if this is/are present and correctable. Antenatal fetal wellbeing can also be assessed by Ultra Sound Scan (USS) namely by Biophysical Profile, Umbilical artery Doppler studies. Therefore, diagnostic ultrasound and clinical applications of it is now must know area for all practicing clinicians. Not only in obstetrics but also in gynecological diseases, its role in diagnosis, staging, treatment and monitoring is also invaluable. In assisted reproduction and fetal medicine, the help of new generation ultrasound are playing the main role. As a basic doctor, one must understand the principles of ultrasound, how to handle it and its applications in the practice.

OBJECTIVES

- To understand basic principles and use of ultrasound in practice of obstetrics and gynecology.
- To know how to handle ultrasound machine as a basic user.
- To diagnose the common obstetric and gynecological disorders.
- To detect the pre-natal abnormal conditions of fetus.
- To detect the abnormal masses of uterus and ovaries.
- To have a chance of doing hand-on sessions under the guidance of obstetrics and gynecological specialists

TARGET PARTICIPANTS

- General Practitioners, Medical Officers, House Officers
- Medical students
